Cabinets that are good for your customers ... and great for you.

Today, it's more important than ever to offer healthier, environmentally friendly cabinets, fixtures and millwork. PureBond® is the EPA award-winning hardwood plywood technology that eliminates the risk of toxic urea formaldehyde emissions.

The cabinets we make with PureBond® technology are visually appealing, functional ... plus moisture-resistant and durable, too. So when you offer them, you'll be providing your customers a great indoor environment they'll absolutely love.

To learn how you can catch today's healthy wave in cabinetry and offer great new options to your customers, call **XXX-XXX-XXXX** or visit us online at **www.XXXXXX.com**.

NAHB green ... LEED® compliant ... CARB Phase 2 certified
